## DETAILED ACTION

### *Claim Objections*

1. Claim 5 is objected to because of the following informalities:

"it" should be replaced by the element represented thereby.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jobelius (US 5248131).

Jobelius discloses a compression strut including a preloaded extension spring 214 having a first end and a second end, a damper (see Fig. 3) which is disposed inside the extension spring, which has a housing 210a that is supported on the first end of the extension spring and which has a piston rod 210b that is extended from the housing and movable over a damping range and an operating element 210e, which comprises an actuating tappet 210h which is joined to the second end of the extension spring and which is movable over a total range c that includes the damping range a of the piston rod and a no-load range b of the actuating tappet (note that the actuating tappet 210h is unloaded until contact with operating element 210e).

Re claim 2, see Fig. 3.

Art Unit: 3683

Re claim 3, see tube 212.

Re claim 4, see Fig. 3.

Re claim 7, see damper 210e.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jobelius (US 5248131).

MPEP 2144.04.V.D. states that adjustment where needed is not a patentable advance.

Here adjustment of the device is needed to accommodate various deck configurations. It would have been obvious to one of ordinary skill in the art to which the invention pertains at the time the invention was made to have configured the device of Jobelius for longitudinal adjustment.

***Allowable Subject Matter***

6. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3683

*Conclusion*

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dodson et al., Seibert et al., Reuschenbach et al. ('874 and '231), Masamura, Nicholls, Smith, and Locher disclose related devices.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin A Pezzlo whose telephone number is (703) 306-4617. The examiner can normally be reached on M-F 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Lavinder can be reached on (703) 308-3421. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9326.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.
